<u>Table 4.1 - 2020 RW by County:</u> The information contained in this tab was developed to support the base year data for the associated reclaimed water projections. Information sources include District GIS utility service area data, District-sourced BEBR generated small area parcel-based population estimates and projections, and Florida Department of Health GIS data for central sewer and onsite septic systems for all developed properties in Florida, per the Florida Water Management Inventory.

<u>Table 4.2 - 2045 RW Projections:</u> The information contained in this tab reflects 2020 estimates and 2045 projections for total service area population, septic population, and adjusted service area population by wastewater treatment facility and county in the District's four Planning Regions (Northern, Heartland, Tampa Bay and Southern). This information also includes 2020 estimates of total wastewater, reuse, supplemental (transfer) and disposal flows, 2045 projected additional wastewater and supplemental (transfer) flows, and 2045 projected total flows for wastewater, supplemental flows, and beneficial reuse in the District's four Planning Regions.

- Notes:

  1.) All values are shown in million gallons per day.
  2.) 2020 information obtained from FDEP 2020 Reuse Inventory.
  3.) Differences between wastewater flows at treatment facilities and the sum of water reused and disposed from these facilities can exist due to the addition of post-treatment supplemental water (e.g., concentrate), transfer of flows between facilities, in-facility processes etc. that can lead to double counting of flows, and/or metering inaccuracies.
